Certified Professional Applied Psychology

INTRODUCTION

Applied psychology, as a specialty area within the broader field of psychology, is of course closely related to its parent field. Since the 1970s, applied psychology has continued growing into a robust profession and academic field of study. Although the exact number of practicing applied psychologists is unknown, it is estimated that between 1974 and 1990, the number in the U.S. grew from 20,000 to 63,000. Applied psychologists are still experts in assessment and psychotherapy, and have expanded their focus to address issues of prevention, gerontology, and even sports and the criminal justice system. With the expending of health care system in Malaysia, applied psychology is a developing careers that in high demand especially within health care sectors.
